

The power behind the tranquility.

Introducing TetraPond's powerful new Water Garden Pumps

From cascading waterfalls to flowing streams, the heart of any water garden is the water. TetraPond's innovative new line of pumps delivers exceptional performance, sleek design, advanced technology and long-life. The GP series pumps are completely submersible, while the GPX series pumps operate in or out of the water and incorporate unique HYDRONIC operation. Their unique pyramid shape offers superb stability and a large ENKAMAT® pre-filter that's remarkably easy to clean. With energy-efficient operation, these pumps generate maximum power for any pond application. New TetraPond **Water Garden Pumps** — the power behind the tranquility.
